ABOUT ME

Hi! I am Alejandro Ariza,

A software engineer with a strong understanding of the SOLID principles and a commitment to clean architecture. I am passionate about writing code that is not only clean but also collaborative, believing that the best solutions come from teamwork.

My experience has taught me the importance of creating maintainable and scalable software, and I strive to apply these principles in every project I undertake.

I am always eager to learn and grow, and I am looking for opportunities to bring my unique blend of skills to a dynamic and innovative team.
